

CARBON MONOXIDE INSPECTION TIP SHEET

Annual inspection of your fuel-burning appliances is a critical step in protecting your family against carbon monoxide. Use the tips below to get started today.

Before the call

Find a TSSA-Registered Fuels Contractor in your community using the *Find a Contractor* tool at TSSA's [COSafety.ca](https://www.tssa.ca/cosafety)

During the call

Six questions to ask the contractor

Question #1

Are their inspection staff fully certified by TSSA?

Question #2

Are they able to provide inspections for all of your fuel-burning appliances?

Gas
Fireplace

Gas
Dryer

Furnace

Gas
Stove

Gas Water
Heater

Question #3

Does the inspection include the entire system?

- fuel supply
- the device itself
- chimney/venting system, areas around the device

Question #4

- Will they provide a written inspection report of the devices inspected and the results?

Question #5

- Will they be available to provide additional explanation and answer questions?

Question #6

- Will they supply an estimate?
(always get one)

After the Call

- We recommend you obtain more than one estimate
- Review the information you have gathered
- Select your contractor and book the inspection

After the Inspection

- Review your inspection report
- Ensure, if required, you ask any follow-up questions or seek clarification

The best way to avoid carbon monoxide exposure is to eliminate it at the source.

Use the sticker included in this kit to help track the annual inspection of your fuel-burning appliances.
